Summer Workshop on Pandemics, Bioterrorism, and Global Health Security: From Anthrax to Zika

Threats to global health security continue to evolve due to the changing nature of conflict, advances in science and technology, globalization, and the emergence of new infectious diseases and pandemics. The *Pandemics, Bioterrorism and Global Health Security: From Anthrax to Zika* workshop is designed for professionals and academics, both domestic and international, in public health, the life sciences, the biotechnology and pharmaceutical industries, international affairs, law enforcement, emergency management, and national security who have responsibilities for preventing, preparing for, or responding to pandemics, bioterrorism, and other threats to global health security.

The workshop faculty are internationally recognized experts from the government, private sector, and academia who have been extensively involved with research and policy-making on public health, biodefense, and national security issues.
